

Morning Health talks: «Startups doing Pilots in Hospitals: A how to guide!»

23 May 2023

The **EIT Health Hub** for Greece, coordinated by National Documentation Centre (EKT), organises the Morning Healthtalk event **Startups doing Pilots in Hospitals: A how to guide!** on **23 May 2023, 11:00-13:00 CET (12:00-14:00 EEST, Athens time)**.

Health transformation with the adaptation of new technologies and the wider adoption of innovations can have multiple benefits and impact inter alia to the services offered, cost reduction and resource efficiency, patient experience optimisation.

During this workshop we will learn from the experiences of SymbIASIS programme participants, Startups, Hospitals and other relevant health and pharma organisations, which is the best way to move forward, plan and strategise in order to achieve an open innovation pilot programme in a real world environment such as a hospital or clinic.

Startups and hospitals that managed to collaborate and create real technology testing pilot programmes or business collaborations will share their experiences and the barriers they had to overcome, the best incentives to chose and we will try to identify the secret recipe for this elusive collaboration. Other stakeholders such as Innovation support organisations or international health and pharma organisations will give their aspect on hospital innovation and the way forward.

Presentations and discussions will take place in Greek and English.

The event will end with a moderated discussion panel, where panelists can contribute with their ideas and insights.

Agenda

12:00-12:20	Welcome, EIT Health Beata Kurucz , RIS Collaboration Lead, EIT Health Innostars Georgios Megas , EIT Health HUB Coordinator, EKT
12:20-12:30	Noemi Liber , EIT Health HUB Hungary,
12:30-13:30	<u>Success Stories</u> <i>As seen by Startups:</i> Danae Manolesou & Michalis Boutaris CTOs: Shuttle Catheters/Athroa, Ourlia Nicolatou-Galitis , Founder CureCancer Professor, Hospital Dentistry, National & Kapodistrian University of Athens Christos Panagopoulos , CEO Bioassist

As seen by Hospitals:

Efthymios Avgerinos, Surgeon - Visiting professor Attikon Vascular,

Amanda Psyrris, Chair of Internal Medicine: Attikon 2nd Pathology/Internal Medicine – Oncology,

Panos Vardas, Professor of Cardiology, Hygeia Hospital

As seen by Pharma/Diagnostics Companies

Thanos Vratimos, Digital & Innovation Insights Expert Roche Diagnostics Hellas

13:30-14:00

Panel Discussion on **Hospital Innovation**

Advantages and challenges for hospitals, healthcare personnel and patients; priorities and main interests, inner and outer motivational factors of healthcare providers in innovations.

The Event is organised by the National Documentation Centre of Greece in the framework of the actions of the EIT Health HUB for Greece and the Capacity Building Programme of the Hub, SymbIASIS.

For more information: Mr. Georgios Megas: meqas@ekt.gr,

(You can watch the recording of last year's MHT Hospitals Embracing Innovation here: <https://www.ekt.gr/el/news/28141>)

The National Documentation Center (EKT) is the Greek EIT Health Hub, an initiative of the European Institute of Innovation & Technology for Health. EKT is also the coordinator of the Greek node of the Enterprise Europe Network - Hellas (EEN-Hellas), the largest business support network in the world, and the National Contact Point for Horizon Europe and more specifically for Cluster1 Health and Cluster 4 Digital as well as Marie Curie Actions.

SymbIASIS

The SymbIASIS project is being carried out by the National Documentation Centre (EKT) in its role as a hub of EIT Health in Greece, with the support of the Archimedes Centre for Innovation and Entrepreneurship of NKUA.

The project aims to cover the need to connect hospitals with startups in the sector so that hospitals can be modernised, digitally transformed with open innovation methods and/or Innovation procurement, while at the same time Startups can validate their technological solutions in a real environment with pilot or pre-pilot tests.
